Volume Contents

Number 1. January

1 **Growth and Metabolic Activity of Lemon Juice Vesicle Explants *in Vitro*—**Arie Altman, Yücel Gülsen, and Raphael Goren

7 **Pyruvate Orthophosphate Dikinase from the Immature Grains of Cereal Grasses—**Alejandro O. Meyer, Grahame J. Kelly, and Erwin Latzko

11 **Purification and Regulatory Properties of Mung Bean (*Vigna radiata* L.) Serine Hydroxymethyltransferase—**Desirazu Narasimha Rao and N. Appaji Rao

19 **Catabolism of 5-Aminolevulinic Acid to CO_2 by Etiolated Barley Leaves—**Jeffrey X. Duggan, Erna Meller, and Merrill L. Gassman

23 **A Novel Enolic β-Ketoaldehyde Phytotoxin Produced by *Stemphylium botryosum* f. sp. *lycopersici*. Partial Chemical and Biological Characterization—**Isaac Barash, Gila Pupkin, David Netzer, and Yeol Kashman

28 **Homology of Plant Peroxidases. An Immunochemical Approach—**James M. Conroy, David C. Borzelleca, and Leslie A. McDonell

32 **Minimizing Nitrate Reduction during Kjeldahl Digestion of Plant Tissue Extracts and Stem Exudates. Application to ^{15}N Studies—**Gary M. Pace, Charles T. MacKown, and Richard J. Volk

37 **Characteristics of Teratomas Regenerated *in Vitro* from Octopine-Type Crown Gall—**Lowell D. Owens

41 **Glutamine Synthetase of Germinating Peanuts. Properties of Two Chromatographically Distinct Forms and Their Activity toward 4-Methyleneglutamic Acid—**Harry C. Winter, Gary K. Powell, and Eugene E. Dekker

48 **Temperature and Oxygen Effects on ^{14}C-Photosynthate Unloading and Accumulation in Developing Soybean Seeds—**John H. Thorne

54 **Measuring Chlorophyll *a* and ^{14}C-Labeled Photosynthate in Aquatic Angiosperms by the Use of a Tissue Solubilizer—**Sven Beer, Arthur J. Stewart, and Robert G. Wetzel

58 **Hydrolysis of Ribulose-1,5-bisphosphate Carboxylase by Endoproteinases from Senescing Barley Leaves—**Bruce L. Miller and Ray C. Huffaker

63 **Influence of Protein Synthesis on NO_3^- Reduction, NH_4^+ Accumulation, and Amide Synthesis in Suspension Cultures of Paul's Scarlet Rose—**James A. Bradford and John S. Fletcher

67 **Nucleotide Sequence Homology Exists between the Chloroplast and Nuclear Ribosomal DNAs of *Euglena gracilis*—**Stephanie E. Curtis and James R. Y. Rawson

72 **Oxidation of Reduced Pyridine Nucleotide by a System Using Ascorbate and Hydrogen Peroxide from Plants and Algae—**Yoke Wah Kow, Douglas A. Smyth, and Martin Gibbs

77 **Enhancement of Phloem Exudation from *Fraxinis uhdei* Wenz. (Evergreen Ash) Using Ethylenediaminetetraacetic Acid—**L. R. Costello, James A. Bassham, and Melvin Calvin

83 **Aggregated Forms of Malate and Citrate Synthase Are Localized in Endoplasmic Reticulum of Endosperm of Germinating Castor Bean—**Elma González

88 **Sulfur Dioxide Inhibition of Translocation in Bean Plants—**Kwang Ho Teh and Carroll A. Swanson

93 **Biosynthesis of Ethylene from Methionine in Aminoethoxyvinylglycine-Resistant Avocado Tissue—**James E. Baker, James D. Anderson, Douglas O. Adams, Akiva Apelbaum, and Morris Lieberman

98 **Vacuolar Localization of Proteases and Degradation of Chloroplasts in Mesophyll Protoplasts from Senescing Primary Wheat Leaves—**Vernon A. Wittenbach, Willy Lin, and Richard R. Hebert

103 **Promotion by Gibberellic Acid of Polyamine Biosynthesis in Internodes of Light-Grown Dwarf Peas—**Yao-ren Dai, Ravindar Kaur-Sawhney, and Arthur W. Galston

107 **Effects of Iron and Oxygen on Chlorophyll Biosynthesis. I. *In Vivo* Observations on Iron and Oxygen-Deficient Plants—**Susan C. Spiller, Ann M. Castelfranco, and Paul A. Castelfranco

112 **Effects of Iron and Oxygen on Chlorophyll Biosynthesis. II. Observations on the Biosynthetic Pathway in Isolated Etiochloroplasts—**Barbara M. Chereskin and Paul A. Castelfranco

117 **A Potential Pathway for Galactose Metabolism in *Cucumis sativus* L., a Stachyose Transporting Species—**Kenneth C. Gross and David M. Pharr

122 **Degradation of Isolated Tomato Cell Walls by Purified Polygalacturonase *in Vitro*—**Axel P. N. Themmen, Gregory A. Tucker, and Donald Grierson

125 **Chilling-Susceptibility of the Blue-Green Alga *Anacystis nidulans*. III. Lipid Phase of Cytoplasmic Membrane—**Taka-Aki Ono and Norio Murata

130 **Metabolism of Proline, Glutamate, and Ornithine in Proline Mutant Root Tips of *Zea mays* (L.)—**Christa Dierks-Ventling and Chiara Tonelli

135 **Protein Synthesis and Photosynthetic Recovery in the Resurrection Plant, *Selaginella lepidophylla*—**William G. Eickmeier

139 **Effects of Powdery Mildew Infection on the Efficiency of CO_2 Fixation and Light Utilization by Sugar Beet Leaves—**Thomas R. Gordon and John M. Duniway

143 **Carbamoyl Phosphate Synthetase Activity from the Cotyledons of Developing and Germinating Pea Seeds—**Chris Kollöffel and Bep Verkerk

146 **Solubilization of Microsomal-Associated Phosphatidylinositol Synthase from Germinating Soybeans—**Michele L. Robinson and George M. Carman

150 ***In Vitro* Synthesis and Processing of Wheat α-Amylase. Translation of Gibberellic Acid-Induced Wheat Aleurone Layer RNA by Wheat Germ and *Xenopus laevis* Oocyte Systems—**Rebecca S. Boston, Timothy J. Miller, Janet E. Mertz, and Richard R. Burgess

155 **Collection and Identification of Allelopathic Compounds from the Undisturbed Root System of Bigalta Limpograss (*Hemarthria altissima*)—**Chung-Shih Tang and Chiu-Chung Young

161 **Isolation and Characterization of an Iron-Containing Superoxide Dismutase from Water Lily, *Nuphar luteum*—**Marvin L. Salin and Susan M. Bridges

166 **Relative Content of NO_3^- and Reduced N in Xylem Exudate as an Indicator of Root Reduction of Concurrently Absorbed $^{15}NO_3^-$—**Thomas W. Rufty, Jr., Richard J. Volk, Peter R. McClure, Daniel W. Israel, and C. David Raper, Jr.

171 **Ion Balance, Uptake, and Transport Processes in N_2-Fixing and Nitrate- and Urea-Dependent Soybean Plants—**Daniel W. Israel and William Jackson

179 **Characterization of a Photosynthesizing Reconstituted Spinach Chloroplast Preparation. Regulation by Primer, Adenylates, Ferredoxin, and Pyridine Nucleotides—**Yoke Wah Kow and Martin Gibbs

187 **ATP-Dependent Calcium Transport in Plasmalemma Preparations from Soybean Hypocotyls. Effect of**

Hormone Treatments—B. Dorota Kubowicz, Larry N. Vanderhoef, and John B. Hanson

192 **Enhanced Incorporation of Tritium into Glycolate during Photosynthesis by Tobacco Leaf Tissue in the Presence of Tritiated Water**—Richard B. Peterson

198 **Altered Glycine Decarboxylation Inhibition in Isonicotinic Acid Hydrazide-Resistant Mutant Callus Lines and in Regenerated Plants and Seed Progeny**—Israel Zelitch and Mary B. Berlyn

205 **Changes in Two Ribonuclease Isozymes during Rust Infection of Flax Cotyledons**—Benjamin C. S. Sutton and Michael Shaw

210 **Interaction of Perredoxin-NADP Oxidoreductase with the Thylakoid Membrane**—Nestor Carrillo and Ruben H. Vallejos

214 **Octopine Accumulation Early in Crown Gall Development is Progressive**—Penelope Toothman

220 **Redistribution of Tritium during Germination of Grain Harvested from *myo*-[2-^{3}H]Inositol- and *scyllo*-[*R*-^{3}H]Inositol-Labeled Wheat**—Ken Sasaki and Frank Loewus

226 **Reduction in Sink-Mobilizing Ability following Periods of High Carbon Flux**—Roger E. Wyse and Robert A. Saftner

229 **Ozone Inhibition of Photosynthesis in *Chlorella sorokiniana***—Robert L. Heath, Paula E. Frederick, and Phrosene E. Chimiklis

234 **Ribosomal RNA Synthesis in Soybean Suspension Cultures Growing in Different Media**—Paul J. Jackson and Karl G. Lark

240 **Regulation of Ethylene Biosynthesis in Virus-Infected Tobacco Leaves. II. Time Course of Levels of Intermediates and *in Vivo* Conversion Rates**—Ad de Laat and Leendert C. van Loon

246 **Amino Acid Transport in Suspension-Cultured Plant Cells. III. Common Carrier System for the Uptake of L-Arginine, L-Aspartic Acid, L-Histidine, L-Leucine, and L-Phenylalanine**—Carl N. McDaniel, Robert K. Holterman, Roger F. Bone, and Paul M. Wozniak

250 **Twenty-Four-Hour Induction of Freezing and Drought Tolerance in Plumules of Winter Rye Seedlings by Desiccation Stress at Room Temperature in the Dark**—David Siminovitch and Yves Cloutier

256 **Correlation between Cold- and Drought-Induced Frost Hardiness in Winter Wheat and Rye Varieties**—Yves Cloutier and David Siminovitch

259 **Measurement of Photorespiration in Algae**—Brendan C. Birmingham, John R. Coleman, and Brian Colman

263 **On the Participation of Phosphoribulokinase in the Light Regulation of CO_2 Fixation**—U. Ingo Flügge, Mark Stitt, Martha Freisl, and Hans W. Heldt

268 **Cytoplasmic Male Sterility in Barley. VIII. Lipoxygenase Activity and Anther Amino Nitrogen in the *msml-Rfmla* System**—Hannu Ahokas

273 **Localization of Ribulose Bisphosphate Carboxylase in the Guard Cells by an Indirect, Immunofluorescence Technique**—Soundararajan Madhavan and Bruce N. Smith

SHORT COMMUNICATIONS

278 **Inhibition of Shoot Geotropism by Neutral Buffers**—Luann Z. Wright and David L. Rayle

280 **A Comparison of Intrinsic Endoplasmic Reticulum Membrane Proteins in Maturing Seeds and Germinated Seedlings of Castor Bean**—David B. Goldberg, Salam Al-Marayati, and Elma González

283 **Simultaneous Consideration of Tissue and Substrate Potassium Concentration in K^+ Uptake Kinetics: A Model**—M. Yaeesh Siddiqi and Anthony D. M. Glass

Number 2. February

287 **Photoperiodic Control of Gibberellin Metabolism in Spinach**—James D. Metzger and Jan A. D. Zeevaart

292 **Osmoregulation in the *Avena* Coleoptile. Control of Solute Uptake in Peeled Sections**—Thomas T. Stevenson and Robert E. Cleland

296 **Senescence and the Fluidity of Rose Petal Membranes. Relationship to Phospholipid Metabolism**—Amihud Borochov, Abraham H. Halevy, and Meir Shinitzky

300 **Intracellular Localization of Enzymes of Carbon Metabolism in *Mesembryanthemum crystallinum* Exhibiting C_3 Photosynthetic Characteristics of Performing Crassulacean Acid Metabolism**—Klaus Winter, Joyce G. Foster, Gerald E. Edwards, and Joseph A. M. Holtum

308 **[^{15}N]NMR Determination of Asparagine and Glutamine Nitrogen Utilization for Synthesis of Storage Protein in Developing Cotyledons of Soybean in Culture**—Thomas A. Skokut, Joseph E. Varner, Jacob Schaefer, Edward O. Stejskal, and Robert A. McKay

314 **^{15}N- and [^{13}C]NMR Determination of Utilization of Glycine for Synthesis of Storage Protein in the Presence of Glutamine in Developing Cotyledons of Soybeans**—Thomas A. Skokut, Joseph E. Varner, Jacob Schaefer, Edward O. Stejskal, and Robert A. McKay

317 **Enhancement of Wound-Induced Ethylene Synthesis by Ethylene in Preclimacteric Cantaloupe**—Neil E. Hoffman and Shang Fa Yang

323 **Effect of IAA on Growth and Soluble Cell Wall Polysaccharides Centrifuged from Pine Hypocotyl Sections**—Maurice E. Terry, David McGraw, and Russell L. Jones

327 **Effect of Atmospheric CO_2 Enrichment on Growth, Nonstructural Carbohydrate Content, and Root Nodule Activity in Soybean**—Gary A. Finn and William A. Brun

332 **Auxin-Induced Changes in the Population of Translatable Messenger RNA in Elongating Sections of Soybean Hypocotyl**—Linda L. Zurfluh and Tom J. Guilfoyle

338 **Auxin- and Ethylene-Induced Changes in the Population of Translatable Messenger RNA in Basal Sections and Intact Soybean Hypocotyl**—Linda L. Zurfluh and Tom J. Guilfoyle

341 **Photosynthetic Response of Seagrasses to Ultraviolet-A Radiation and the Influence of Visible Light Intensity**—Robert P. Trocine, John D. Rice, and Gary N. Wells

345 **Sources of Ammonium in Oat Leaves Treated with Tabtoxin or Methionine Sulfoximine**—Thomas A. Frantz, David M. Peterson, and Richard D. Durbin

349 **Fruit Age and Changes in Abscisic Acid Content, Ethylene Production, and Abscission Rate of Cotton Fruits**—Gene Guinn

353 **Restricted Nitrate Influx and Reduction in Corn Seedlings Exposed to Ammonium**—Charles T. MacKown, William A. Jackson, and Richard J. Volk

360 **Immunopurification and Initial Characterization of Dicotyledonous Phytochrome**—Marie-Michèle Cordonnier and Lee H. Pratt

366 **Callose Induction in Cowpea by Uridine Diphosphate Glu-**

cose and Calcium Phosphate-Boric Acid Treatments—Deirdre M. Tighe and Michèle C. Heath

371 **Effect of Photoinhibitory Treatments on the Activity of Light-Activated Enzymes of C_3 and C_4 Photosynthetic Carbon Metabolism**—Stephen B. Powles, Keith S. R. Chapman, and F. R. Whatley

375 **Effects of Kaempferol on the Oxidative Properties of Intact Plant Mitochondria**—Patrick Ravanel, Michel Tissut, and Roland Douce

379 **A Comparative Evaluation of the Level of Concanavalin A Binding by Enriched Plasma Membrane Fractions from Developing Soybean Roots**—Robert L. Berkowitz and Robert L. Travis

385 **Inhibition of Ethylene Biosynthesis by Aminoethoxyvinylglycine and by Polyamines Shunts Label from 3,4-[^{14}C]Methionine into Spermidine in Aged Orange Peel Discs**—Zeev Even-Chen, Autar K. Mattoo, and Raphael Goren

389 **Hormonal Control of Tobacco Crown Gall Tumor Morphology**—Richard M. Amasino and Carlos O. Miller

394 **Biosynthesis, Deposition, and Partial Characterization of Potato Suberin Phenolics**—Wendell Cottle and P. E. Kolattukudy

400 **Accumulation of β-Carboline Alkaloids and Serotonin by Cell Cultures of *Peganum harmala* L. I. Correlation between Plants and Cell Cultures and Influence of Medium Constituents**—Florenz Sasse, Ute Heckenberg, and Jochen Berlin

405 **Relation of Polyamine Synthesis and Titer to Aging and Senescence in Oat Leaves**—Ravindar Kaur-Sawhney, Liu-mei Shih, Hector E. Flores, and Arthur W. Galston

411 **Relation of Polyamine Biosynthesis to the Initiation of Sprouting in Potato Tubers**—Ravindar Kaur-Sawhney, Liu-mei Shih, and Arthur W. Galston

416 **Water Stress Effects on Nitrogen Assimilation and Growth of *Trifolium subterraneum* L. Using Dinitrogen or Ammonium Nitrate**—Theodore M. DeJong and Donald A. Phillips

421 **Separation of Mg-Protoporphyrin IX and Mg-Protoporphyrin. IX. Monomethyl Ester Synthesized *de novo* by Developing Cucumber Etioplasts**—Thomas P. Fuesler, Claire M. Hanamoto, and Paul A. Castelfranco

424 **Chilling-Induced Ethylene Production in Cucumbers (*Cucumis sativus* L.)**—Chien Yi Wang and Douglas O. Adams

428 **Temperature Effects on Seed Imbibition and Leakage Mediated by Viscosity and Membranes**—J. Brad Murphy and Thomas L. Noland

432 **Effect of Changes in Shoot Carbon-Exchange Rate on Soybean Root Nodule Activity**—Larry E. Williams, Theodore M. DeJong, and Donald A. Phillips

437 **Rapid Correlation between the Leaves of Spinach and the Photocontrol of a Peroxidase Activity**—Félicien Karege, Claude Penel, and Hubert Greppin

442 **Chloroplast Respiration. A Means of Supplying Oxidized Pyridine Nucleotide for Dark Chloroplastic Metabolism**—Yoke Wak Kow, David L. Erbes, and Martin Gibbs

448 **Adenylate Levels, Energy Charge, and Phosphorylation Potential during Dark-Light and Light-Dark Transition in Chloroplasts, Mitochondria, and Cytosol of Mesophyll Protoplasts from *Avena sativa* L.**—Rüdiger Hampp, Marion Goller, and Hubert Ziegler

456 **A Malic Acid Permease in Isolated Vacuoles of a Crassulacean Acid Metabolism Plant**—Christa Buser-Suter, Andres Wiemken, and Philippe Matile

460 **Simultaneous Measurement of NH_4^+ Absorption and N_2 Fixation by *Glycine max* L. Response to Temperature, pH, and External Nitrogen Concentration**—Lynn Marcus-Wyner and D. William Rains

465 **L-Ascorbic Acid Biosynthesis in *Ochromonas danica***—Johannes P. Helsper, Lea Kagan, Coral L. Hilby, Tracy M. Maynard, and Frank A. Loewus

469 **Influence of Varying CO_2 and Orthophosphate Concentrations on Rates of Photosynthesis, and Synthesis of Glycolate and Dihydroxyacetone Phosphate by Wheat Chloroplasts**—Hideaki Usuda and Gerald E. Edwards

474 **Studies on a Factor in Sweet Potato Root Which Agglutinates Spores of *Ceratocystis fimbriata*, Black Rot Fungus**—Mineo Kojima, Kazuhito Kawakita, and Ikuzo Uritani

479 **Nodule and Leaf Nitrate Reductases and Nitrogen Fixation in *Medicago sativa* L. under Water Stress**—P. Aparicio-Tejo and Manuel Sánchez-Díaz

483 **Determination of NAD Malic Enzyme in Leaves of C_4 Plants. Effects of Malate Dehydrogenase and Other Factors**—Marshall D. Hatch, Mikio Tsuzuki, and Gerald E. Edwards

492 **Water Potentials Induced by Growth in Soybean Hypocotyls**—Anthony J. Cavalieri and John S. Boyer

497 **Effect of Sodium Chloride on Fruit Ripening of the Nonripening Tomato Mutants *nor* and *rin***—Yosef Mizrahi, Regina Zohar, and Shoshana Malis-Arad

502 **Mechanism of Action of the Diphenyl Ether Herbicide Acifluorfen-Methyl in Excised Cucumber (*Cucumis sativus* L.) Cotyledons. Light Activation and the Subsequent Formation of Lipophilic Free Radicals**—Gregory L. Orr and F. Dana Hess

508 **Light and Dark Controls of Nitrate Reduction in Wheat (*Triticum aestivum* L.) Protoplasts**—Andrew J. Reed and David T. Canvin

514 **Characteristics of Cultured Tomato Cells after Prolonged Exposure to Medium Containing Polyethylene Glycol**—Avtar K. Handa, Ray A. Bressan, Sangita Handa, and Paul M. Hasegawa

522 **Kaempferol 3-*O*-Galactoside, 7-*O*-Rhamnoside is the Major Green Fluorescing Compound in the Epidermis of *Vicia faba***—Richard D. Vierstra, Theodore R. John, and Kenneth L. Poff

526 **An Accurate Temperature Correction Model for Thermocouple Hygrometers**—Michael J. Savage, Alfred Cass, and James M. de Jager

531 **Alteration in the Acyl Lipid Composition of Thylakoids Induced by Aging and Its Effect on Thylakoid Structure**—Landis E. A. Henry, Reto J. Strasser, and Paul-André Siegenthaler

537 **Partial Purification of Proteinase Inhibitors from Wounded Tomato Plants**—Thomas E. Clevel[redacted]d and Lowell L. Black

SHORT COMMUNICATIONS

543 **Relationship between Poly(Adenosine 5'-diphosphate-ribose) Synthesis and Transcriptional Activity in Wheat Embryo Chromatin**—Kimiko Sasaki and Mamoru Sugita

546 **Effects of Centrifugal Force and Centrifugation Time on the Sedimentation of Plant Organelles**—Jerry Nagahashi and Kathleen Hiraike

549 **Protochlorophyll(ide) in a Blue-Green Alga**—Jack Myers, Jo-Ruth Graham, and Richard T. Wang

551 **Correction**

Number 3. March

553 **Niacin Biosynthesis in Seedlings of *Zea mays***—John B. Tarr and Joseph Arditti

557 **Effect of Ethylene on the Gibberellic Acid-Enhanced Synthesis and Release of Amylase by Isolated Barley Aleurone Layers**—Kenneth C. Eastwell and Mary S. Spencer

563 **Modes of Ethylene Action in the Release of Amylase from Barley Aleurone Layers**—Kenneth C. Eastwell and Mary S. Spencer

568 **Effects of Light Quantity and Quality on the Decarboxylation of Malic Acid in Crassulacean Acid Metabolism Photosynthesis**—Simon R. Barrow and William Cockburn

572 **Isolation of a Wheat Cell Line with Altered Membrane Properties**—László Erdei, László Vigh, and Dénes Dudits

575 **Intracellular Localization of Peptide Hydroiases in Wheat (*Triticum aestivum* fL.) Leaves**—Stephen P. Waters, Elaine R. Noble, and Michael J. Dalling

580 **Oxidation of *c*-Type Cytochromes by the Membrane-Bound Cytochrome Oxidase (Cytochrome aa_3) of Blue-Green Algae**—Peter F. Kienzl and Günter A. Peschek

585 **Physical Aspects of Fruit Growth. Stress Distribution around Lenticels**—Ken Brown and John Considine

591 **Stimulation of Ammonia and 2-Oxoglutarate-Dependent O_2 Evolution in Isolated Chloroplasts by Dicarboxylates and the Role of the Chloroplast in Photorespiratory Nitrogen Recycling**—K. C. Woo and C. Barry Osmond

597 **Phase Shift in the Circadian Rhythm of Floral Promotion by Far-Red Energy in *Hordeum vulgare* L.**—Gerald F. Deitzer, Rebecca G. Hayes, and Merten Jabben

602 **Catabolism of Porphobilinogen by Etiolated Barley Leaves**—Jeffrey X. Duggan, Erna Meller, and Merrill L. Gassman

609 **Synthesis and Movement of Abscisic Acid in Water-Stressed Cotton Leaves**—Robert C. Ackerson

614 **Root and Nodule Enzymes of Ammonia Assimilation in Two Plant-Conditioned Symbiotically Ineffective Genotypes of Alfalfa (*Medicago sativa* L.)**—R. Gene Groat and Carroll P. Vance

619 **Effects of Membrane ATPase Inhibitors on Light-Induced Phase Shifting of the Circadian Clock in *Neurospora crassa***—Hideaki Nakashima

624 **Effects of Cryogenic Treatment on Plantlet Production from Frozen and Unfrozen Date Palm Callus**—Jane M. Ulrich, Bernard J. Finkle, and Brent H. Tisserat

628 **An α-Galactosidase with Hemagglutinin Properties from Soybean Seeds**—Elena del Campillo and Leland M. Shannon

632 **Factors Influencing β-Glucan Synthesis by Particulate Enzymes from Suspension-Cultured *Lolium multiflorum* Endosperm Cells**—Robert J. Henry and Bruce A. Stone

637 ***Ent*-Kaurene Biosynthesis in Extracts of *Helianthus annuus* L. Seedlings**—Jane Shen-Miller and Charles A. West

642 **Chlorophyll *a* Fluorescence Transients in Mesophyll and Guard Cells. Modulation of Guard Cell Photophosphorylation by CO_2**—Anastasios Melis and Eduardo Zeiger

648 **Energy Coupling in H^+-Amino Acid Cotransport. ATP Dependence of the Spontaneous Electrical Repolarization of the Cell Membranes in Oat Coleoptiles**—Thomas B. Kinraide and Bud Etherton

653 **Studies on the Production of *Digitalis* cardenolides by Plant Tissue Culture. II. Effect of Light and Plant Growth Substances on Digitoxin Formation by Undifferentiated Cells and Shoot-Forming Cultures of *Digitalis purpurea* L. Grown in Liquid Media**—Manabu Hagimori, Takashi Matsumoto, and Yukiteru Obi

657 **A Direct Confirmation of the Standard Method of Estimating Intercellular Partial Pressure of CO_2**—Thomas D. Sharkey, Katsu Imai, Graham D. Farquhar, and Ian R. Cowan

660 **Effect of Photoperiod on Metabolism of [^{3}H]Gibberellins A_1, 3-*epi*-A_1, and A_{20} in *Agrostemma githago* L.**—M. George Jones and Jan A. D. Zeevaart

663 **Effect of Benzyladenine Treatment Duration on δ-Aminolevulinic Acid Accumulation in the Dark, Chlorophyll Lag Phase Abolition, and Long-Term Chlorophyll Production in Excised cotyledons of Dark-Grown Cucumber Seedlings**—Roger Lew and Hideo Tsuji

668 **Pigmentation and Soluble Peroxidase Isozyme Patterns of Leaves of *Pedilanthus tithymaloides* L. *variegatus* as a Result of Daily Temperature Differences**—Pierre Bricage

672 **Far-Red Reversal of Red Light Effect during Long-Night Induction of Potato (*Solanum tuberosum* L.) Tuberization**—Edward J. Batutis and Elmer E. Ewing

675 **An Improved Bioassay for Cytokinins Using Cucumber Cotyledons**—R. A. Fletcher, V. Kallidumbil, and P. Steele

678 **Glycoprotein Biosynthesis in *Chlamydomonas*. I. *In Vitro* Incorporation of Galactose from UDP-[^{14}C]Galactose into Membrane-Bound Protein**—Winfried C. Lang

682 **Bud Induction with Cytokinin. A Local Response to Local Application**—W. Scott Grayburn, Paul B. Green, and Guy Steucek

687 **Autoinhibition of Ethylene Production in Citrus Peel Discs. Suppression of 1-Aminocyclopropane-1-carboxylic Acid Synthesis**—Joseph Riov and Shang Fa Yang

691 **Biochemical Basis for Partitioning of Photosynthetically Fixed Carbon between Starch and Sucrose in Soybean (*Glycine max* Merr.) Leaves**—Steven C. Huber and Daniel W. Israel

697 **Rapid Increase in Deep Supercooling in Xylem Parenchyma**—Sung-Gak Hong and Edward Sucoff

701 **Analysis of Polyamines in Higher Plants by High Performance Liquid Chromatography**—Hector E. Flores and Arthur W. Galston

707 **Comparative Effects of Ancymidol and Its Analogs on Growth of Peas and *Ent*-Kaurene Oxidation in Cell-Free Extracts of Immature *Marah macrocarpus* Endosperm**—Ronald C. Coolbaugh, David I. Swanson, and Charles A. West

712 **Comparative Effects of Substituted Pyrimidines on Growth and Gibberellin Biosynthesis in *Gibberella fujikuroi***—Ronald C. Coolbaugh, David R. Heil, and Charles A. West

717 **Dissociation, Reassociation, and Purification of Plastid and Cytosolic Phosphoglucose Isomerase Isozymes**—Norman F. Weeden and Leslie D. Gottlieb

724 **Stability and Synthesis of Phospholipids during Desiccation and Rehydration of a Desiccation-Tolerant and a Desiccation-Intolerant Moss**—Robert R. C. Stewart and J. Derek Bewley

728 **Diffusion Limitation of Oxygen Uptake and Nitrogenase Activity in the Root Nodules of *Parasponia rigida***

Merr. and Perry—John D. Tjepkema and Robert J. Cartica

734 **A Reanalysis of the Two-Component Phloem Loading System in *Beta vulgaris***—Julia W. Maynard and William J. Lucas

SHORT COMMUNICATIONS

740 **Oxidation of NAD(P)H in a Reconstituted Spinach Chloroplast Preparation Using Ascorbate and Hydrogen Peroxide**—Yoke Wah Kow, Douglas A. Smyth, and Martin Gibbs

742 ***Phycomyces:* Discovery of the Aiming Error in the Avoidance Response**—R. I. Gamow and Barbel Böttger

745 **Dinitrogen Fixation in Male-Sterile Soybeansh**—John Imsande and Edward J. Ralston

747 **Correction**

Number 4. April

749 **Partial Characterization of the *in Vitro* Activation of Inactive Pyruvate, Pi Dikinase from Darkened Maize Leaves**—Hitoshi Nakamoto and Tatsuo Sugiyama

754 **Transmission of the Monocarpic Senescence Signal via the Xylem in Soybean**—Larry D. Noodén and Betty Jean Murray

757 **Crassulacean Acid Metabolism in the Succulent C_4 Dicot, *Potrulaa oleracea* L under Natural Environmental Conditions**—Karen E. Koch and Robert A. Kennedy

762 **Dark Stomatal Movement in Sunflowers in Response to Illumination under Nitrogen**—Philippe Couchat, Gérard Lasceve, and Pascal Audouin

766 **Stimulation of H_2S Emission from Pumpkin Leaves by Inhibition of Glutathione Synthesis**—Heinz Rennenberg and Philip Filner

771 **Control of Leaf Expansion by Nitrogen Nutrition in Sunflower Plants. Role of Hydraulic Conductivity and Turgor**—John W. Radin and John S. Boyer

776 **Photosynthetic Metabolism of Aspartate in Mesophyll and Bundle Sheath Cells Isolated from *Digitaria sanguinalis* (L.) Scop., a $NADP^+$-Malic Enzyme C_4 Plant**—Yuh-Jang Shieh, Maurice S. B. Ku, and Clanton C. Black, Jr.

781 **Potassium Channels in *Chara corallina*. Control and Interaction with the Electrogenic H^+ Pump**—David W. Keifer and William J. Lucas

789 ***Ethylene Production and Leaflet Abscission of Three Peanut* Genotypes Infected with *Cercospora arachidicola* Hori**—Darold L. Ketring and Hassan A. Melouk

793 **Leucine Transport in Cells Isolated from Cold-Hardened and Nonhardened Winter Rye**—Leslie R. Barran and Jas Singh

798 **Evidence for a Cl^--Stimulated MgATPase Proton Pump in Oat Root Membranes**—Richard G. Stout and Robert E. Cleland

804 ***Inducible Cadmium Binding Complexes* of Cabbage and Tobacco**—George J. Wagner and Melvin M. Trotter

810 ***Effect of 2,4-Dichlorophenoxyacetic Acid on Glucosylation* of Scopoletin to Scopolin in Tobacco Tissue Culture**—Fumitsugu Hino, Mitsuo Okazaki, and Yoshiharu Miura

814 **Light-Induced Increase in the Number and Activity of Ribosomes Bound to Pea Chloroplast Thylakoids *in Vivo***—Leonard E. Fish and Andre T. Jagendorf

825 ***Isozymes of the Glycolytic Enzymes in Endosperm* from Developing Castor Oil Seeds**—Jan A. Miernyk and David T. Dennis

829 **Mineral Reserves in Castor Beans: The Dry Seed**—John N. A. Lott, John S. Greenwood, and Catherine M. Vollmer

834 **Wheat Storage Proteins. Isolation and Characterization of the Gliadin Messenger RNAs**—Thomas W. Okita and Frank C. Greene

840 **Ethylene, Ethane, Acetaldehyde, and Ethanol Production by Plants under Stress**—Thomas W. Kimmerer and Theodore T. Kozlowski

848 **Glutamate Synthase from Rice Leaves**—Akira Suzuki and Pierre Gadal

853 **Metabolism of Tryptophan, Indole-3-acetic Acid, and Related Compounds in Parasitic Plants from the Genus *Orobanche***—Volker Magnus, Šumski Šimaga, Sonja Iskrić, and Sergije Kveder

859 **Acceleration of Membrane Senescence in Cut Carnation Flowers by Treatment with Ethylene**—John E. Thompson, Shimon Mayak, Meir Shinitzky, and Abraham H. Halevy

864 **Studies on the Pectic Substances of Plant Cell Walls. III. Degradation of Carrot Root Cell Walls by Endopectate Lyase Purified from *Erwinia aroideae***—Haruyoshi Konno and Yoshiki Yamasaki

869 **Seasonally Induced Changes in Acyl Lipids and Fatty Acids of Chloroplast Thylakoids of *Pinus silvestris*. A Correlation between the Level of Unsaturation of Monogalactosyldiglyceride and the Rate of Electron Transport**—Gunnar Öquist

876 **Arginine and Ornithine Decarboxylases, the Polyamine Biosynthetic Enzymes of Mung Bean Seedlings**—Arie Altman, Ra'anan Friedman, and Nitsa Levin

880 **Nitrogen Isotope Fractionation Associated with Nitrate Reductase Activity and Uptake of NO_3^- by Pearl Millet**—André Mariotti, Françoise Mariotti, Marie-Louise Champigny, Noelle Amarger, and Alexis Moyse

885 **Polyribosomes from Pear Fruit. II. Changes Occurring in *Pulp Tissues during Ripening and Senescence***—Alain Drouet and Claude Hartmann

888 ***Oligomycin Effects on ATPase and Photophosphorylation* of Pea Chloroplast Thylakoid Membranes**—Pierre-Yves Bouthyette and Andre T. Jagendorf

897 **Origin of Acetate in Spinach Leaf Cell**—Bodo Liedvogel and Paul K. Stumpf

904 **Genome Expression during Normal Leaf Development. I. Cellular and Chloroplast Numbers and DNA, RNA, and Protein Levels in Tissues of Different Ages within a Seven-Day-Old Wheat Leaf**—Caroline Dean and Rachel M. Leech

911 **Photosynthesis and Respiration of Developing *Populus tremuloides* Internodes**—Andrew A. Brayman and Michail Schaedle

916 **Isolation and Characterization of Metabolically Competent Mitochondria from Spinach Leaf Protoplasts**—Mikio Nishimura, Roland Douce, and Takashi Akazawa

921 **Temperature Dependence of Photosynthesis in *Agropyron smithii* Rydb. I. Factors Affecting Net CO_2 Uptake in Intact Leaves and Contribution from Ribulose-1,5-*Bisphosphate Carboxylase Measured in Vivo* and *in Vitro***—Russell K. Monson, Mark A. Stidham, George J. Williams III, Gerald E. Edwards, and Ernest G. Uribe

929 **Temperature Dependence of Photosynthesis in *Agropyron smithii* Rydb. II. Contribution from Electron Transport and Photophosphorylation**—Mark A. Stidham, Ernest G. Uribe, and George J. Williams III

935 **Effects of G, a Growth Regulator from *Eucalyptus grandis*, on Photosynthesis**—Thomas D. Sharkey, Gay F.

Stevenson, and Dugald M. Paton

939 **Regulation of H^+ Excretion. Effects on Osmotic Shock**—Bernard Rubinstein

945 **Regulation of H^+ Excretion. Role of Protein Released by *Osmotic Shock***—Bernard Rubinstein

950 **Estimation of Free, Conjugated, and Diffusible Indole-3-acetic Acid in Etiolated Maize Shoots by the Indolo-α-pyrone Fluorescence Method**—Moritoshi Iino and Denis J. Carr

957 **Water Relations of Seagrasses. Stationary Volumetric Elastic Modulus and Osmotic Pressure of the Leaf Cells of *Halophila ovalis*, *Zostera capricorni*, and *Posidonia australis***—Stephen D. Tyerman

966 ***Effect of Salinity on Tomato Fruit Ripening***—Yosef Mizrahi

971 ***Why Is the Substomatal Chamber as Large as It Is?***—William F. Pickard

975 **Demonstration of the Intercellular Compartmentation of *l-Menthone Metabolism in Peppermint (Mentha piperita)* Leaves**—Rodney Croteau and Jerry N. Winters

978 **Involvement of a Primary Electrogenic Pump in the Mechanism for HCO_3^- Uptake by the Cyanobacterium *Anabaena variabilis***—Aaron Kaplan, Drora Zenvirth, Leonora Reinhold, and Joseph A. Berry

983 ***Glutamine Synthetase in Spinach Leaves.* Immunological Studies and Immunocytochemical Localization**—*Bertrand Hirel, Catherine Perrot-Rechenmann,* Akira Suzuki, Jean Vidal, and Pierre Gadal

SHORT COMMUNICATION

988 **Lysine-Ketoglutarate Reductase Activity in Developing *Maize Endosperm***—Paulo Arruda, Ladaslav Sodek, and William José da Silva

Number 5. May

991 **Role of the Colorless Polypeptides in Phycobilisome Reconstitution from Separated Phycobiliproteins**—Richard E. Glick and Barbara A. Zilinskas

998 **A New Method for the Determination of Hydraulic Conductivity and Cell Volume of Plant Cells by Pressure Clamp**—Stephen Wendler and Ulrich Zimmermann

1004 ***Cadmium-Binding Components in Soybean Plants***—James L. Casterline, Jr. and Neal M. Barnett

1008 **Induction of HCO_3^- Transporting Capability and High Photosynthetic Affinity to Inorganic Carbon by Low Concentration of CO_2 in *Anabaena variabilis***—Yenda Marcus, Drora Zenvirth, Eitan Harel, and Aaron Kaplan

1013 **Metabolism of Monoterpenes: Conversion of *l*-Menthone to *l*-Menthol and *d*-Neomenthol by Stereospecific Dehydrogenases from Peppermint (*Mentha piperita*) Leaves**—Robert Kjonaas, Charlott Martinkus-Taylor, and Rodney Croteau

1018 **Leaf Conductance as a Function of Photosynthetic Photon Flux Density and Absolute Humidity Difference from Leaf to Air**—Merrill R. Kaufmann

1023 **Evaluation of Season, Temperature, and Water Stress Effects on Stomata Using a Leaf Conductance Model**—Merrill R. Kauffmann

1027 **Kinetic Characterization of Spinach Leaf Sucrose-Phosphate Synthase**—Jacob Amir and Jack Preiss

1031 **Potentiating Effect of Pure Oxygen on the Enhancement of Respiration by Ethylene in Plant Storage Organs: A Comparative Study**—Athanasios Theologis and George G. Laties

1036 **Selective Enhancement of Alternative Path Capacity in Plant Storage Organs in Response to Ethylene Plus Oxygen: A Comparative Study**—Athanasios Theologis and George G. Laties

1040 **Inhibition of Photosynthetic Energy Conversion by Cupric Iron. Evidence for Cu^{2+}-Coupling Factor 1 Interaction**—Ernest G. Uribe and Benjamin Stark

1046 **Host-Pathogen Interactions. XX. Biological Variation in the Protection of Soybeans from Infection by *Phytophthora megasperma* f. sp. *glycinea***—Anne E. Desjardins, Lorraine M. Ross, Michael W. Spellman, Alan G. Darvill, and Peter Albersheim

1051 **Leaf Water Potential, Stomatal Resistance, and Photosynthetic Response to Water Stress in Peach Seedlings**—J. Mark Hand, Eric Young, and Aurea C. Vasconcelos

1055 **Incorporation of [^{14}C]Phenylalanine into Flavan-3-ols and Procyanidins in Cell Suspension Cultures of Douglas Fir**—Helen A. Stafford, Marc Shimamoto, and Hope H. Lester

1060 **Wound-Induced RNase Activity in Sweet Potato. Evidence for Regulation at Transcription**—Joseph A. Sacher, Janet Tseng, Roshalda Williams, and Andrew Cabello

1066 **L-Canavanine Metabolism in Jack Bean, *Canavalia ensiformis* (L.) DC. (Leguminosae)**—Gerald A. Rosenthal

1070 ***Methionine Biosynthesis in Lemna*: Inhibitor Studies**—Anne H. Datko and S. Harvey Mudd

1077 ***Methionine Biosynthesis in Lemna. Studies* on the Regulation of Cystathionine γ-Synthase, *O*-Phosphohomoserine Sulfhydrylase, and *O*-Acetylserine Sulfhydrylase**—Gregory A. Thompson, Anne H. Datko, S. Harvey Mudd, and John Giovanelli

1084 **Studies on the Reconstitution of O_2-Evolution of Chloroplasts**—Richard T. Sayre and George M. Cheniae

1096 **Beta-Amylases from Alfalfa (*Medicago sativa* L.) Roots**—Douglas C. Doehlert, Stanley H. Duke, and Laurens Anderson

1103 **Levels of Oxygenated Fatty Acids in Young Corn and *Sunflower* Plants**—Brady A. Vick and Don C. Zimmerman

1109 **Sources of Free IAA in the Mesocotyl of Etiolated Maize Seedlings**—Moritoshi Iino and Denis J. Carr

1113 **Inhibition of Cyanide-Resistant Respiration in Pea Cotyledon Mitochondria by Chloroquine**—Terrance W. James and Mary S. Spencer

1116 **Ascorbate as a Substrate for Photoproduction of Hydrogen by Photosystem I of Chloroplasts**—Avner Mualem and David O. Hall

1121 **Cyanide-Insensitive Respiration in Relation to Growth of a Low-Temperature Basidiomycete**—David B. Chalkley and Roy L. Millar

1128 **Effect of Ethylene on the Release of α-Amylase through Cell Walls of Barley Aleurone Layers**—Tuan-hua David Ho, James Abroms, and Joseph E. Varner

1132 **Dehydration Effects on Imbibitional Leakage from Desiccation-Sensitive Seeds**—Michael R. Becwar, Phillip C. Stanwood, and Eric E. Roos

1136 **Effects of Glycine Hydroxamate, Carbon Dioxide, and Oxygen on Photorespiratory Carbon and Nitrogen Metabolism in Spinach Mesophyll Cells**—Arthur L. Lawyer, Karen L. Cornwell, Sherry L. Gee, and James A. Bassham

1140 **Effects of Cations and Abscisic Acid on Chlorophyll *a* Fluorescence in Guard Cells of *Vicia faba***—Teruo Ogawa, David Grantz, John Boyer, and Govindjee

1145 **Complete Turgor Maintenance at Low Water Potentials *in the Elongating Region of Maize Leaves***—V. Arturo Michelena and John S. Boyer

1150 **Influence of Calcium and Magnesium on Ethylene Production by Apple Tissue Slices**—Morris Lieberman and Shiow Y. Wang

1156 **Control of Phytochrome of Cytoplasmic Precursor rRNA Synthesis in the Cotyledons of Mustard Seedlings**—Wilfried Thien and Peter Schopfer

1161 **Physiology of Root-Associated Nitrogenase Activity in *Oryza sativa***—Peter van Berkum and Charles Sloger

1165 **Measurement and Preservation of the *in Vivo* Activation of Ribulose 1,5-Bisphosphate Carboxylase in Leaf Extracts**—John T. Perchorowicz, Deborah A. Raynes, and Richard G. Jensen

1169 **Inhibition of Cytokinin Action and of Heat/Aging Induced Potential for Cytokinin Action by Inhibitors of Membrane Synthesis and Function**—Daphne C. Elliott

1173 **Uptake and Metabolic Fate of Glucose, Arabinose, and Xylose by *Zea mays* Coleoptiles in Relation to Cell Wall Synthesis**—Nicholas C. Carpita, Ronald A. Brown, and Kathleen M. Weller

1181 **Elicitation of Casbene Synthetase Activity in Castor Bean. The Role of Pectic Fragments of the Plant Cell Wall in Elicitation by a Fungal Endopolygalacturonase**—Robert J. Bruce and Charles A. West

1189 **Extranuclear DNA of a Marine Chromophytic Alga. Restriction Endonuclease Analysis**—Jane Aldrich, Stanton Gelvin, and Rose Ann Cattolico

1196 **Pyridine Nucleotide Specificity of Barley Nitrate Reductase**—Frank A. Dailey, Tsungmin Kuo, and Robert L. Warner

1200 **Characteristics of a Nitrate Reductase in a Barley Mutant *Deficient in NADH Nitrate Reductase***—Frank A. Dailey, Robert L. Warner, David A. Somers, and Andris Kleinhofs

1205 **Visualization of a Spinach Plastid Transcriptionally Active DNA-Protein Complex in a Highly Condensed Structure**—Jean F. Briat, Claude Gigot, Jean P. Laulhere, and Regis Mache

1212 **Quantification of Allelopathic Potential of Sorghum Residues by Novel Indexing of Richards' Function Fitted to Cumulative Cress Seed Germination Curves**—Fredric R. Lehle and Alan R. Putnam

1217 **Electrophoretic Comparison of Mitochondrial Polypeptides from Maize Lines Susceptible and Resistant to *Helminthosporium maydis* Race T**—Monique Diano

1222 **Effect of Carbon Dioxide and Light on Ethylene Production in Intact Sunflower Plants**—Pawan K. Bassi and Mary S. Spencer

1226 **Transport, Metabolism, and Redistribution of Xylem-Borne Amino Acids in Developing Pea Shoots**—Aileen A. Urquhart and Kenneth W. Joy

1233 **A Soybean Seed Urease-Null Produces Urease in Cell Culture**—Joseph C. Polacco, Andrew L. Thomas, and Peggy J. Bledsoe

1241 **A Comparison of the Properties of ATPase Associated with Wheat and Cauliflower Plasma Membranes**—M. Keith Pomeroy and Edward J. McMurchie

Number 6. June

1247 **Trehalose Toxicity in *Cuscuta reflexa*. Sucrose Content Decreases in Shoot Tips upon Trehalose Feeding**—K. Veluthambi, S. Mahadevan, and Ramesh Maheshwari

1252 **Adenine Nucleotide Content of Corn Roots as Affected by Injury and Subsequent Washing**—John W. Gronewald and John B. Hanson

1257 **Fatty Acid Synthetase of *Spinacia oleracea* Leaves**—Takashi Shimakata and Paul K. Stumpf

1263 **Photosynthetic CO_2 Fixation at Air Levels of CO_2 by Isolated Spinach Chloroplasts**—David K. Stumpf and Richard G. Jensen

1268 **H_2 and CO_2 Evolution by Anaerobically Adapted *Chlamydomonas reinhardtii* F-60**—Elchanan S. Bamberger, Dan King, David L. Erbes, and Martin Gibbs

1274 **Cytokinin Modification of Mitochondrial Function**—Carlos O. Miller

1278 **Aggregation of Plant Protoplasts by Artificial Lipid Vesicles**—Hirofumi Uchimiya, Naomi Kudo, Toshifumi Ohgawara, and Hiroshi Harada

1281 **Phenotypical Temperature Adaptation of Protein Synthesis in Wheat Seedlings. Qualitative Aspects. Involvement of Aminoacid:tRNA-Ligases**—Manfred Weidner, Carola Mathée, and Franz-Karl Schmitz

1289 **Pathway of Malic Acid Synthesis in Response to Ion Uptake in Wheat and Lupin Roots: Evidence from Fixation of ^{13}C and ^{14}C**—Marianne Popp, C. Barry Osmond, and Roger E. Summons

1293 **Solubilization and Characterization of an Acyl-Coenzyme A. *O*-Lysophospholipid Acyltransferase from the Microsomes of Developing Safflower Seeds**—Robert A. Moreau and Paul K. Stumpf

1298 **Nitrate Reduction of Roots of Soybean (*Glycine max* [L.] Merr.) Seedlings**—Steven J. Crafts-Brandner and James E. Harper

1304 **Distribution of Free and Ester Indole-3-Acetic Acid in the Cortex and Stele of the *Zea mays* Mesocotyl**—William L. Pengelly, Prudence J. Hall, Aga Schulze, and Robert S. Bandurski

1308 **Interaction between Mitochondrial Cytochromes and Linoleic Acid Hydroperoxide. Possible Confusion with Lipoxygenase and Alternative Pathway**—Jacques Dupont, Pierre Rustin, and Claude Lance

1315 **Vacuoles from Sugarcane Suspension Cultures. I. Isolation and Partial Characterization**—Margaret Thom, Andrew Maretzki, and Ewald Komor

1320 **Vacuoles from Sugarcane Suspension Cultures. II. Characterization of Sugar Uptake**—Margaret Thom, Ewald Komor, and Andrew Maretzki

1326 **Vacuoles from Sugarcane Suspension Cultures. III. Protonmotive Potential Difference**—Ewald Komor, Margaret Thom, and Andrew Maretzki

1331 **Induction of δ-Aminolevulinic Acid Synthase Activity and Inhibition of Heme Synthesis in *Euglena gracilis* by *N*-Methyl Mesoporphyrin IX**—Samuel I. Beale and Terrence Foley

1334 **Enzymes of Amide and Ureide Biogenesis in Developing Soybean Nodules**—Paul H. S. Reynolds, Michael J. Boland, Dale G. Blevins, Karel R. Schubert, and Douglas D. Randall

1339 **Some Physiological Changes Occurring during the Senescence of Auxin-Deprived Pear Cells in Culture**—Claudine Balagué, Alain Latché, Jean Fallot, and Jean-Claude Pech

1344 **Regulation of Cytoplasmic and Vacuolar pH in Maize Root Tips under Different Experimental Conditions**—Justin K. M. Roberts, David Wemmer, Peter M. Ray, and Oleg Jardetzky

1348 **Senescence of Rice Leaves. VII. Proline Accumulation in Senescing Excised Leaves**—Chang Ying Wang, Shu Hua Cheng, and Ching Huei Kao

1350 **Penetration of Soybean Root Systems by Abscisic Acid Isomers**—Albert H. Markhart III

1353 **Abscisic Acid Transport Coefficients of *Phaseolus* Root Systems**—Edwin L. Fiscus, Frank R. Stermitz, and Luis G. Amoros

1356 **Thermal Behavior and Lipid Composition of Cauliflower Plasma Membranes in Relation to ATPase Activity and Chilling Sensitivity**—Lesley C. Wright, Edward J. McMurchie, M. Keith Pomeroy, and John K. Raison

1361 **Peroxidation of Tobacco Membrane Lipids by the Photosensitizing Toxin, Cercosporin**—Margaret E. Daub

1365 **Metabolism of L-Threonic Acid in *Rumex x acutus* L. and *Pelargonium crispum* (L.) L'Hér**—Johannes P. Helsper and Frank A. Loewus

1369 **Low Temperature-Induced Alterations in the Chloroplast and Microsomal Membranes of *Dunaliella salina***—Daniel V. Lynch and Guy A. Thompson, Jr.

1376 **Formulae for Determination of Chlorophyllous Pigments Extracted with *N,N*-Dimethylformamide**—Rami Moran

1382 **Transport of the Herbicide 3-Amino-1,2,4-Triazole by Cultured Tobacco Cells and Leaf Protoplasts**—Susan R. Singer and Carl N. McDaniel

1387 **Chloroplast DNA Levels and the Control of Chloroplast Division in Light-Grown Wheat Leaves**—Stephen A. Boffey and Rachel M. Leech

1392 **Development of Photochemical Activity in Relation to Pigment and Membrane Protein Accumulation in Chloroplasts of Barley and Its Virescens Mutant**—David J. Kyle and Saul Zalik

1401 **Uptake and Degradation of Cyclic AMP by Chloronema Cells**—Shobhona Sharma and Man Mohan Johri

1404 **Light Modulation of Phosphofructokinase in Pea Leaf Chloroplasts**—Bruria Heuer, Martha J. Hansen, and Louise E. Anderson

1407 **Light-Dependent Reduction of Hydrogen Peroxide by Ruptured Pea Chloroplasts**—Peter P. Jablonski and John W. Anderson

1414 **Sequestration of Pea Reserve Proteins by Rough Microsomes**—William J. Hurkman and Leonard Beevers

1418 **Photoactivation of the Water-Oxidation System in Isolated Intact Chloroplasts Prepared from Wheat Leaves Grown under Intermittent Flash Illumination**—Taka-aki Ono and Yorinao Inoue

1423 **Spin-Probe Studies during Freezing of Cells Isolated from Cold-Hardened and Nonhardened Winter Rye. Molecular Mechanism of Membrane Freezing Injury**—Jas Singh and Richard W. Miller

1429 **Synthesis and Accumulation of Nitrite in Soybean Nodules Supplied with Nitrate**—John G. Streeter

1435 **Alternative Pathway Respiration and Lipoxygenase Activity in Aged Potato Slice Mitochondria**—Richard M. Shingles, Geoffrey P. Arron, and Robert D. Hill

1439 **Cyanide-Resistant Respiration in Suspension Cultured Cells of *Nicotiana glutinosa* L.**—Michael E. Horn and Dan Mertz

1444 **Superoxide Dismutase. A Possible Protective Enzyme against Ozone Injury in Snap Beans (*Phaseolus vulgaris* L.)**—Edward H. Lee and Jesse H. Bennett

1450 **Nuclear Involvement in the Appearance of Chloroplast-Encoded 32,000 Dalton Thylakoid Membrane Polypeptide Integral to the Photosystem II Complex**—Kenneth J. Leto, Aron Keresztes, and Charles J. Arntzen

1459 **Pyrophosphorylases in *Solanum tuberosum*. III. Purification, Physical, and Catalytic Properties of ADPglucose Pyrophosphorylase in Potatoes**—Joseph R. Sowokinos and Jack Preiss

1467 **Polar Lipid Composition of a Plastid Ribosome-Deficient Barley Mutant**—Albert-Jean Dorne, Jean-Pierre Carde, Jacques Joyard, Thomas Börner, and Roland Douce

1471 **Deposition of Matrix and Crystalloid Storage Proteins during Protein Body Development in the Endosperm of *Ricinus communis* L. cv. Hale Seeds**—David J. Gifford, John S. Greenwood, and J. Derek Bewley
